Surgery Diagnoses and Procedures Log AY13-14

Surgery 3rd Year Clerkship Operations and Procedures Log

This log is to identify the specific clinical experiences you encounter during the rotation. You must see or perform each of these required clinical experiences in order to complete this course successfully. Nearly all of these conditions are readily available as both a Direct Care or Team Care experience throughout the clerkship.

Direct Patient Care is defined as “a student will at a minimum complete a SOAP note or a History and Physical Exam document in the course of caring for this patient.” Team Care of the Patient is defined as “a student will participate in the care of the patient with team members in the context of rounding, consulting, ambulatory visits, etc.” Please contact your Clerkship Director with any questions regarding specific patient experiences.

You must alert your attending/resident and/or the clerkship director by midpoint to obtain help if any one of these conditions cannot be identified. Assistance will be given. Each clerkship has a list of appointed alternate mechanisms for achieving each condition, but these should only be used when the condition cannot be completed in the clinical setting.

Note: All Operations and Procedures in the Surgery Clerkship are REQUIRED and will need to be accomplished by the end of the clerkship rotation. ALL of these diagnoses and procedures should be seen in Direct Patient Care.

Each time you enter your Operations or Procedures please hit the SAVE FOR LATER button when exiting the system. On completion of all required Operations and Procedures OR the last day of your clerkship please hit the SUBMIT button.

Required Procedures: All are REQUIRED: Should be seen in Inpatient setting.

- Assist with closure of an abdominal or thoracic incision  
  *(Question 1 of 32 - Mandatory)*
  - Completed
  - Did not complete

- Assist in prep and drape of a patient  
  *(Question 2 of 32 - Mandatory)*
  - Completed
  - Did not complete

- Assist with anesthesia for a major surgical procedure  
  *(Question 3 of 32 - Mandatory)*
  - Completed
  - Did not complete

- Change a wound dressing  
  *(Question 4 of 32 - Mandatory)*
  - Completed
  - Did not complete

- Observe a process of informed consent  
  *(Question 5 of 32 - Mandatory)*
  - Completed
  - Did not complete
