

Chris Lanham R.T. (R) (CT)
Lead Radiologic Technologist
MUSCP Health East

- What is your current role at MUSC? How long have you been with the enterprise?
 - My current role is Lead Radiologic Technologist for our Health East Campus. I've been with MUSCP for 6 years.
- How has your participation in the BRIHTE Leadership Academy impacted/shaped your development as a leader thus far?
 - Being a part of BRIHTE has opened many new areas to MUSC that I never knew existed nor would I have been able to collaborate with. Getting to experience the many different views and goals from other leaders has helped me gain a more global view of what MUSC is, and what we are all capable of when working together.
- Now that you have completed year 1 of the program, what are you most looking forward to for year 2? **OR** What has been your most meaningful experience within the BRIHTE Leadership Academy?
 - I think I'm looking forward to using these new found connections to help break out of our so called "silos". Before BRIHTE, I couldn't honestly tell patients much about food service or the College of Dental Medicine (James and Shaquetta, you two astound me!). I now have built connections across the enterprise that I can use to further assist patients and fellow staff.
- What do the words 'Transformation' and 'Growth' mean to you?
 - I think they're linked. You can't have one without the other. I guess I could best describe it as this: To truly grow, you have to be willing to transform something about yourself.
